

Home Assignment - Enhance the Existing Resume RAG Application by implementing the following features:

- Re-ranking of retrieved resumes
- Deduplication of repeated results
- Summarization of the final results
- Complete end-to-end pipeline integration
- Display all relevant results clearly on the UI

Customize the application based on your organization's branding, including:

- Organization name and logo
- Brand theme and colours
- Professional UI layout
- Responsive design
- Loading, success, validation, and error messages
- Any other relevant organization-specific enhancements

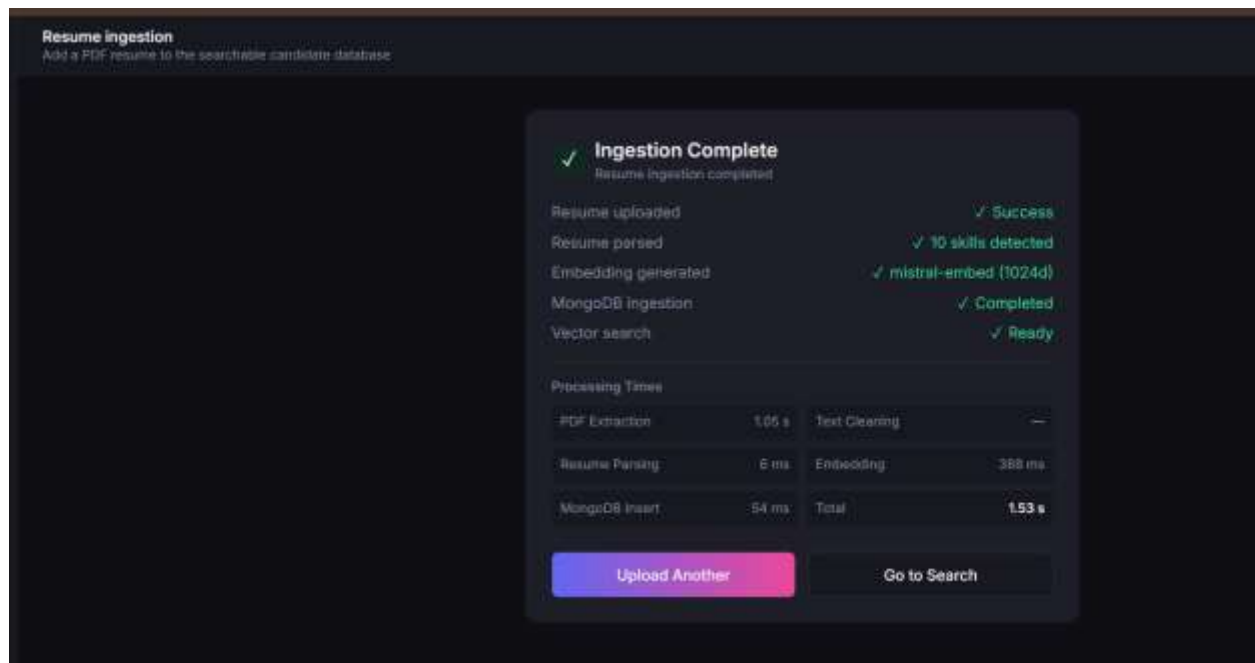

After completing the implementation, test the complete end-to-end application.

Submit the following items in both the WhatsApp group and your GitHub repository:

Resume ingestion Validation

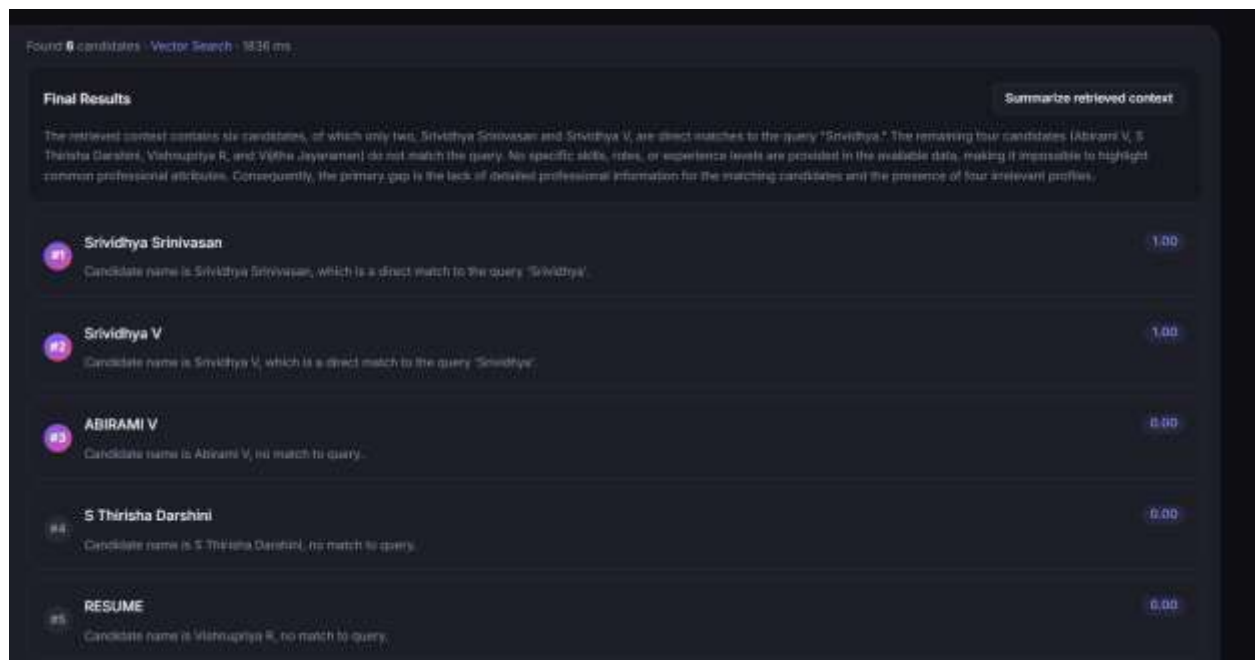

Search – Vector Search with input Srividhya

Result – Re-ranked, de-duplicated (forgot to take screenshot before de-duplication, kindly excuse), added option to summarize retrieved context

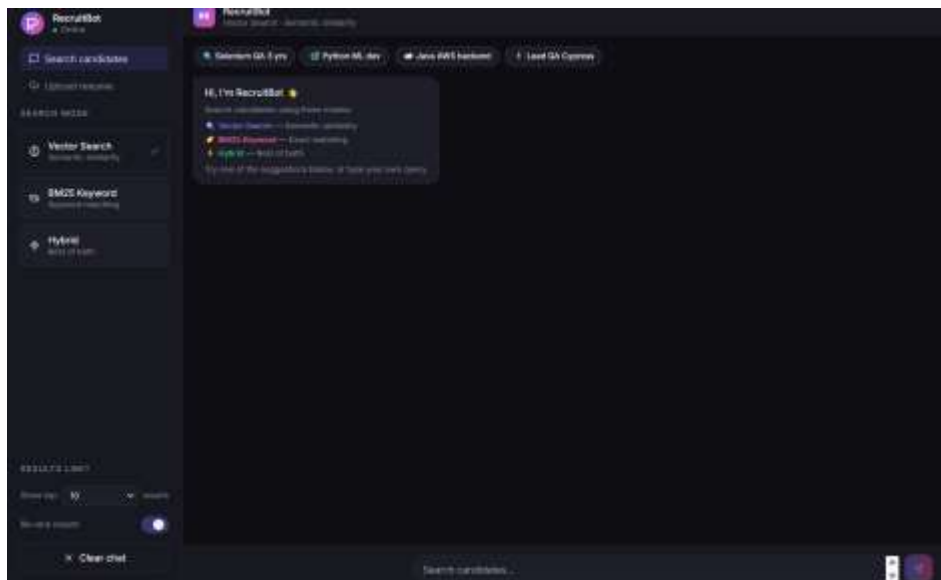

Prompt : Add deduplication in the background to the existing framework and make it as automatically applied. Also add summarization of the final results. The heading should be Final Results with a Summarize retrieved context

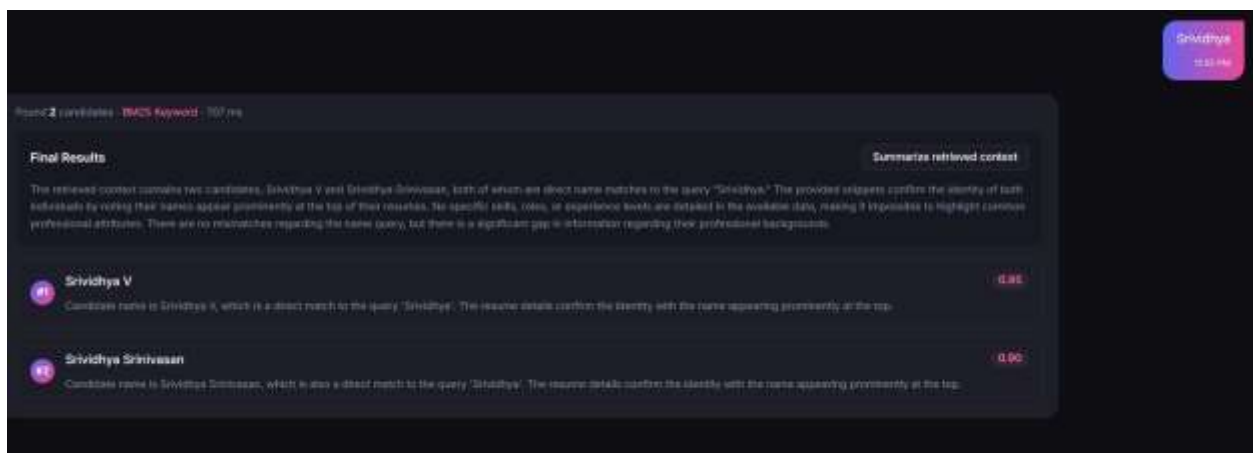

Summarized Context from the Vector search

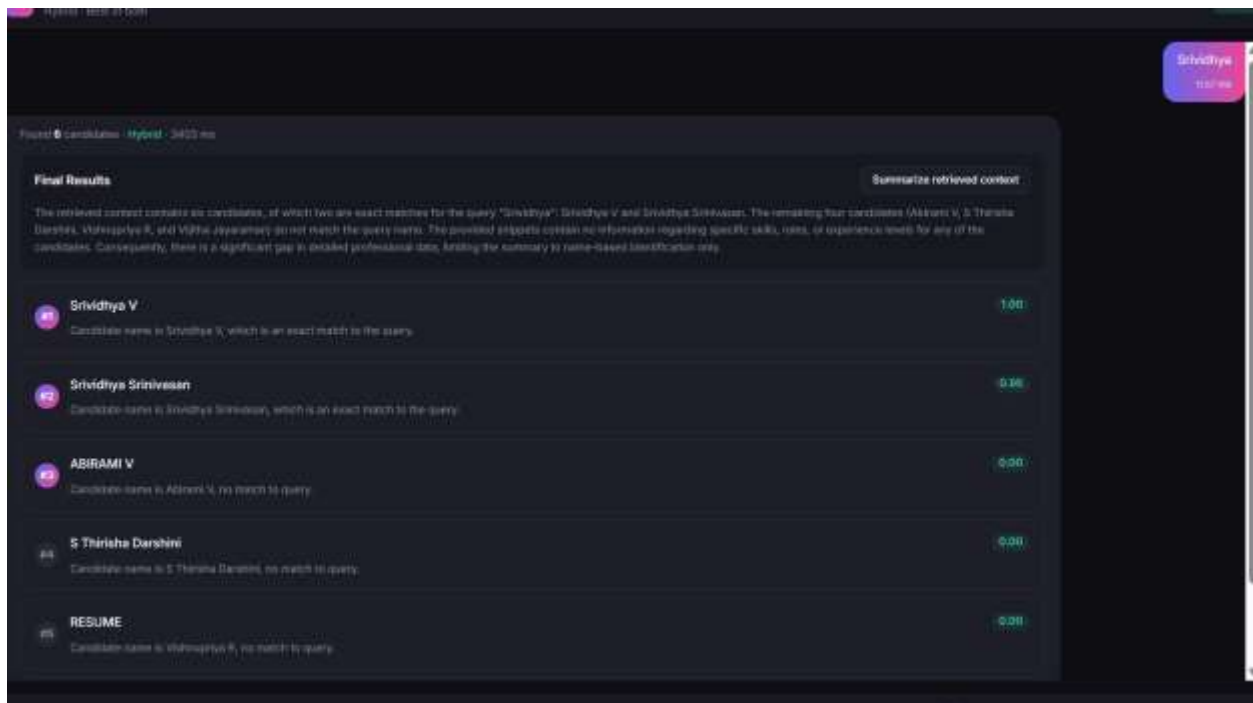

Clear chat cleared the existing search results

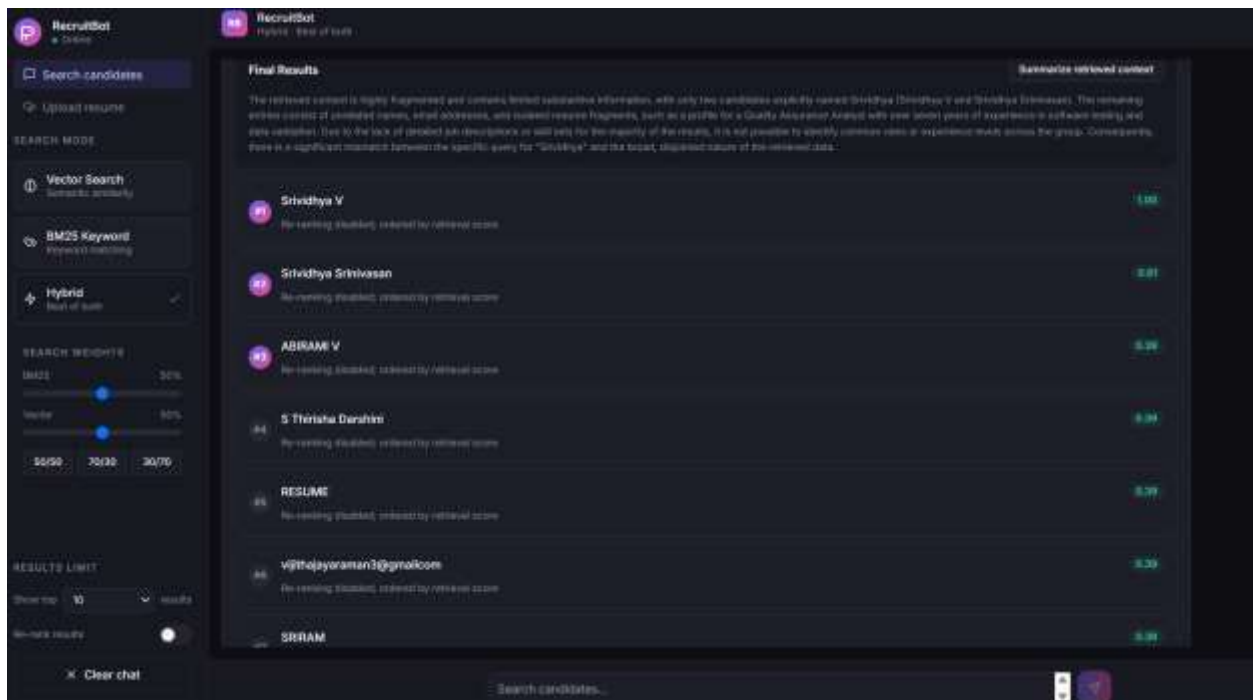

BM25 keyword search with summarized data

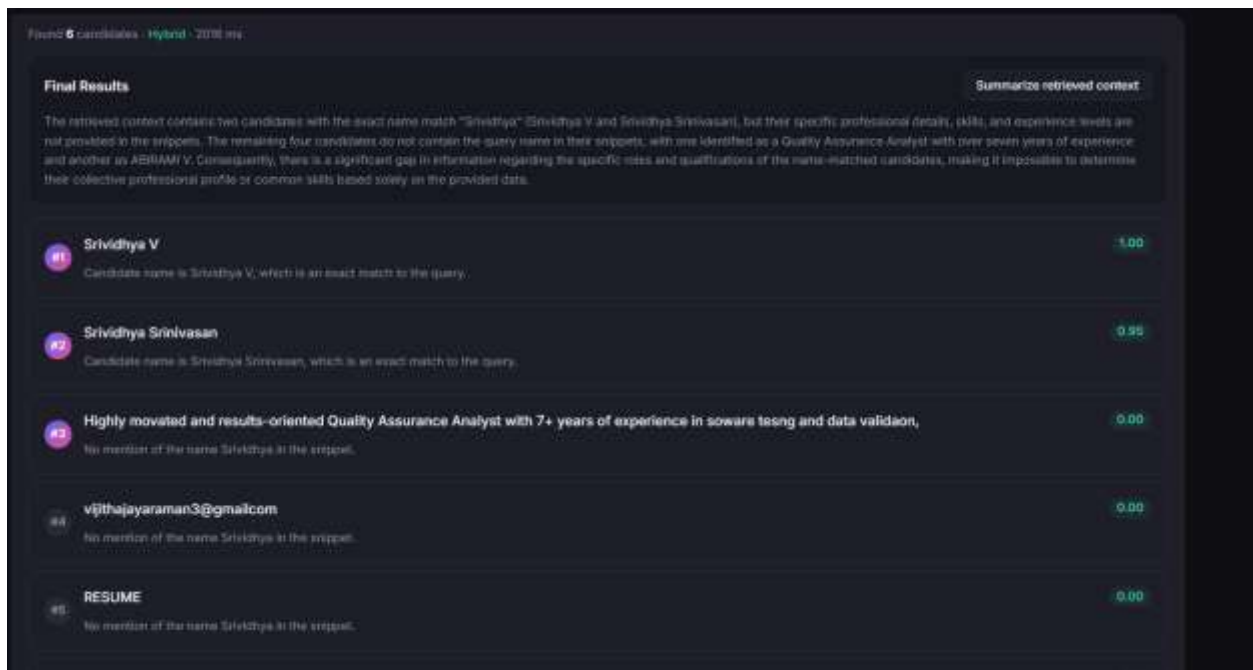

Hybrid search

Re-ranking disabled – Hybrid – since re-ranking was disabled, result given based retrieval score

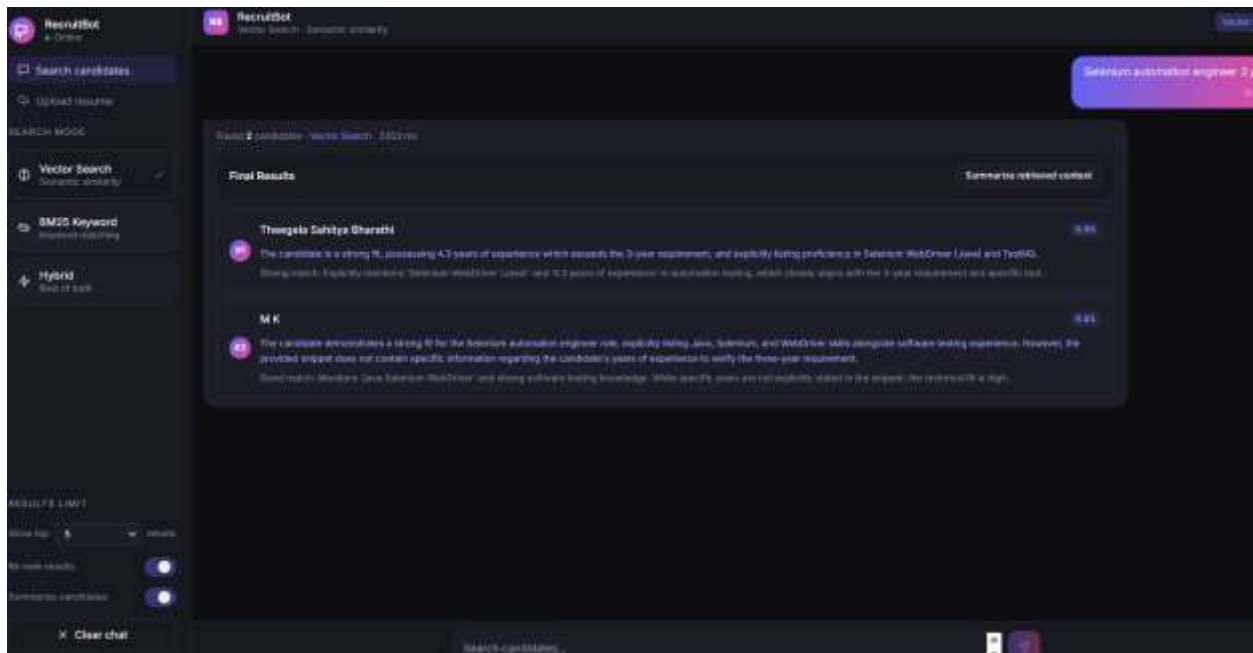

Re-ranking enabled for Hybrid with deduplication

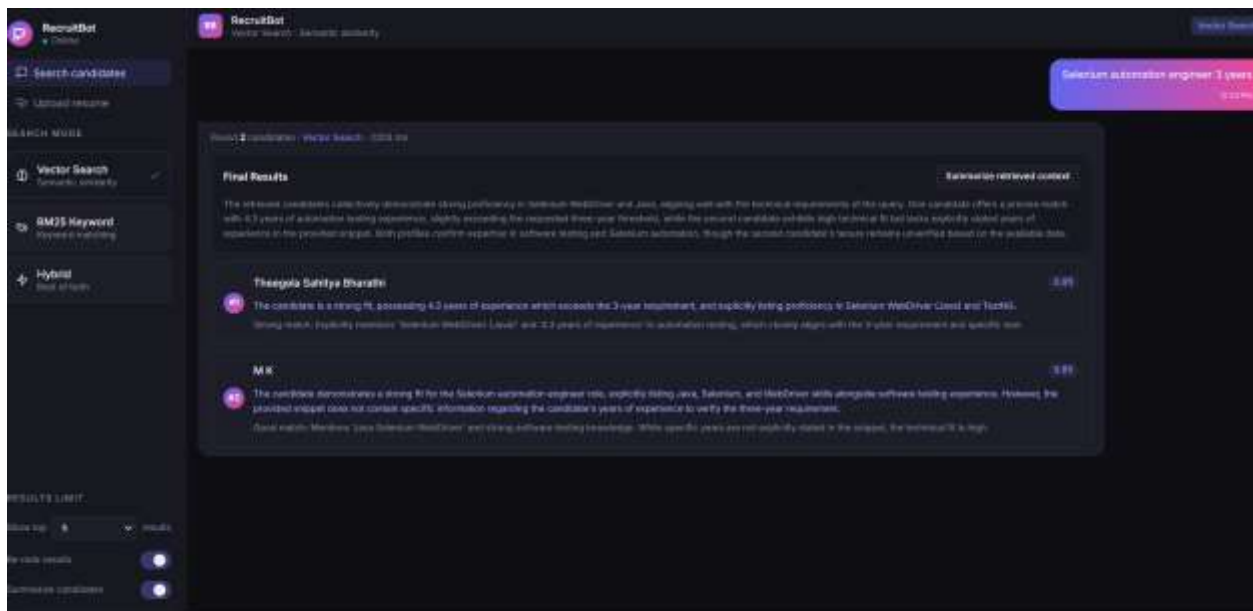

Summarization context for each candidate – UI Option Added to enable/disable

Prompt - Make changes to give brief candidate summary along with each retrieved resume and keep it as an UI option to enable/disable and also in the final results for the overall summary

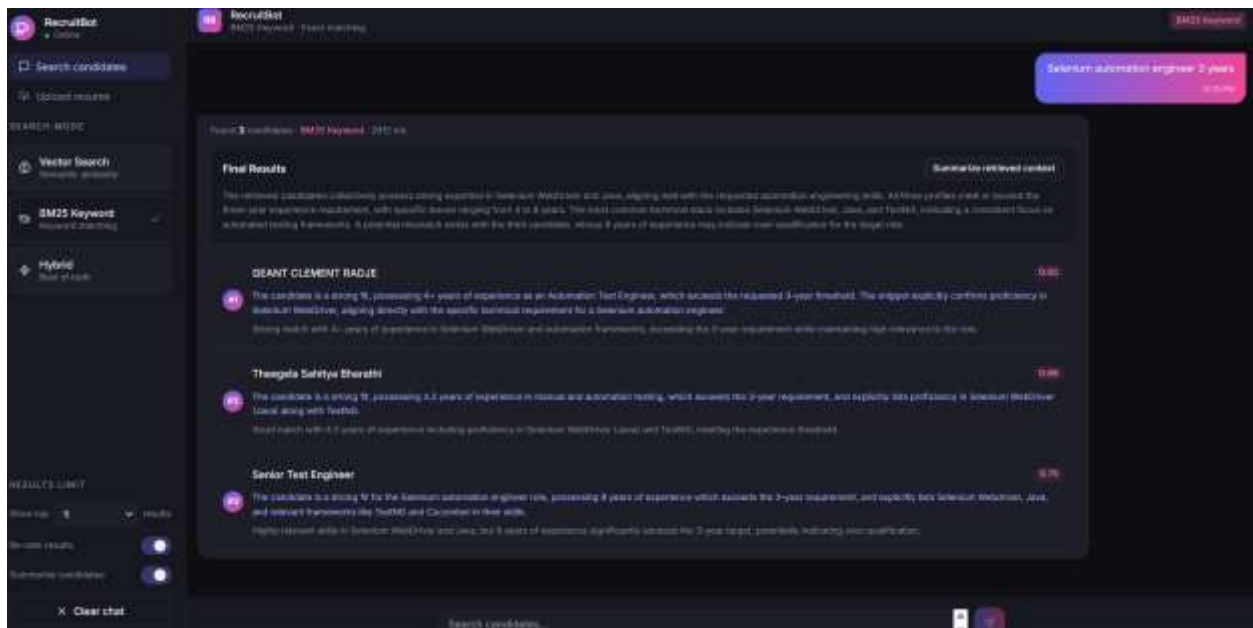

Overall summarization is also be added

Enabling both individual and overall summary

Prompt:

Prompt

I want the background to be changed as like attached screenshot and add the attached logo in the screen and fit it as needed

The selected candidate successfully passed 3 to 4 years of experience, with the strongest matches aligning closely to the requested 3-year benchmark. Current technical skills across the top profiles include Selenium WebDriver, Java, and TestNG, supporting an Automation Test Engineer role. However, the group exhibits significant variance in relevance, as the candidate is over-qualified with 8 years of experience and another lacks needed Selenium automation skills despite filling the Senior. Consequently, some senior candidates offer strong technical alignment, the overall pool contains mixed quality with notable gaps in specific automation proficiency for senior roles.

Theodore Sathya Bharathi | 0.85

The candidate is a strong fit, possessing 4.3 years of experience in automation testing which exceeds the 3-year requirement, and explicitly listing proficiency in Selenium WebDriver Listed as a core skill.

Strong match: 4.3 years experience listed as 3, explicitly positioned in Selenium WebDriver Listed and TestNG, filling the automation engineer profile.

GIANT CLEMENT RADJE | 0.83

The candidate is a strong fit, possessing over 8 years of experience as an Automation Test Engineer, which exceeds the 3-year requirement. They explicitly list Selenium WebDriver as a core skill within their available automation frameworks.

Strong match: 8+ years experience, explicitly an Automation Test Engineer with Selenium WebDriver, Java, and TestFramework design experience.

M K | 0.83

The candidate demonstrates a strong fit for the Selenium automation engineer role, explicitly listing Java, Selenium, and WebDriver skills alongside software testing experience. However, the candidate's job title does not contain specific information regarding the candidate's years of experience, as the three-year requirement cannot be verified.

Good match: Selenium, Java, Selenium-WebDriver, and Test planning, though specific years of experience are not clearly stated in the target.

ARUNKUMAR R | 0.75

The candidate is a strong fit for the experience requirement, possessing 8 years of testing experience which exceeds the requested 3 years, and the target matches automation testing skills. However, the specific use of Selenium is not explicitly mentioned in the provided text, only general automation testing.

Good match: Senior Testing Engineer with 8 years experience in manual and automation testing. Over-qualified for 3 years, but has relevant automation skills.

The selected candidate represent a diverse mix of profiles, including a resume writer, a project manager, a customer service officer, and a digital marketing specialist, with only one candidate possessing relevant experience in AI content creation and advanced language models. The four candidates are open to roles in general operations positions, such as brand managers and creative services, below the specified technical role. There is a significant overlap with the "RM25" query as four out of five candidates have no mention of AI, LLMs, or vector databases. The only partial mention comes from the first candidate, who has experience with AI models but lacks explicit RAG or vector database expertise.

Aishwarya D 960070998

0.45

25

The candidate has limited direct experience in RAG, as the provided snippet only details experience as a Content Writer creating content for AI models using advanced language models, without explicitly mentioning Retrieval-Augmented Generation or related technical implementation.

Candidate has experience creating content for AI models and using advanced language models, which is the closest match to RAG (Retrieval-Augmented Generation) among the provided options. Despite the explicit mention of RAG in their bio.

MAR 2024 till date

0.35

25

The candidate is a poor fit for the query as the resume snippet describes an experienced content writer focused on software quality assurance and defect identification, with no mention of RAG (Retrieval-Augmented Generation) or related AI/ML skills.

Resume writer with software quality experience, while pertinent, lacks the specific mention of AI, LLMs, or RAG technologies.

Positive and professional attitude, motivated and proactive strong project management and presentation skills. Ability

0.25

25

The candidate's profile does not demonstrate a fit for the query "RAG," as the provided snippet focuses exclusively on soft skills such as project management, leadership, and team building without mentioning any technical experience in Retrieval-Augmented Generation or related AI technologies.

General operations and project management profile with no specific technical skills related to RAG or AI.
